---	---	---	--	---

<p>General Notes</p> <p>A General</p> <ol style="list-style-type: none">Contractor must check existing site conditions during tendering and report any discrepancies. No post tender "extras" will be accepted.All material and workmanship to be of the highest possible quality.Contractor to price, produce/manufacture all finishes and material as per General Finishes Specification and Working Drawings. Any Alternative or "equal" substitutes are subject to the designer's approval before proceeding with work.All finishes must be applied or installed according to manufacturer's specifications.Contractor to confirm all equipment locations and dimensions before proceeding with work.Appropriate blocking is to be provided as requiredContractor is to ensure all materials of non-combustable construction, as required by applicable codes and regulations.Where applicable, fire rated ceilings and partitions should be provided, as required by the Ontario Building code, or applicable local codes.Refer to Architectural and Structural engineers drawings for Architectural/ Structural related issues.In the event of any discrepancies between Consultant's drawings contact consultants in question for clarification prior to proceeding with work.The contractor shall coordinate w./Architect, Structural engineer, Mechanical and Electrical engineers in regard to required inspections and provide adequate notice prior to inspection.Provide shop drawings for the following: interior & exterior signage, awnings, light fixtures and plumbing fixtures, and all items listed in drawings.Contractor to review interior design drawings in conjunction with all other consultant drawing package.Contractor to review Hilton Brand Standard to ensure required construction standard are met. <p>B Finishes</p> <ol style="list-style-type: none">Contractor is to provide a sample of all finishes as required for designer's approval before proceeding with work.All fabrics are to be appropriately flame-proofed as required by local building code regulations where applicable. All fabrics to have appropriate flame spread rating and be fibre shielded or scotch-guarded for easy maintenance. Contractor to ensure this is included in all quotations.Where different floor finishes meet, the contractor is to ensure a gradual transition. One	<p>finish is to butt smoothly into the next and be as flush as possible.</p> <p>C Millwork</p> <ol style="list-style-type: none">Unless noted otherwise, all interiors including shelves of storage cabinetry, are to have melamine finish, the colour of which is to match the adjacent millwork. Submit samples for approval before proceeding with work.All cabinet doors, and doors in general, are to have heavy-duty, concealed hinges. All cabinet drawers are to have heavy-duty, full extension metal glides.All Metal work to have clear protection matte sealant to minimize rusting and maintenance.Provide shop drawings for all millwork items, and all items listed in drawings. <p>D Equipment</p> <ol style="list-style-type: none">Contractor to coordinate with mechanical/electrical engineers and manufacturer on site, to confirm mechanical and electrical requirements and all equipment sizes before proceeding with any adjacent millwork. Equipment provided by client must also be coordinated.All built-in equipment for millwork to be supplied by others and installed by the contractor.Security, telephone, computers, public address, audio and special lighting systems are to be supplied by others and installed by the contractor. <p>E Mechanical and Electrical</p> <ol style="list-style-type: none">All light switches and duplex cover plates are to match the color of the wall or fixture to which they will be mounted - verify with designer. Contractor is to review the quality of standard colors to be specified and provide samples for designers approval before proceeding with work.For specifications of outlets, refer to electrical drawings.Unless otherwise specified, all duplex outlets to be Lutron Vario Series or equivalent (verify with designer). All outlets are to be mounted at " 12o/c A.F.F. unless noted otherwise. All switches are to be mounted at 4'-0" A.F.F. o/c, gang plates as required. see elevations to confirm mounting height and orientation.All counter back wall-type duplex outlets are to be mounted horizontally 3" o.c. above the counter, unless otherwise indicated.The electrical contractor is to confirm the location of security, telephone, computer, public address and music system equipment, and provide wire stubs as required. Designer to review and approve location.Contractor is to ensure all lighting fixtures (standard and custom) meet required codes.	<ol style="list-style-type: none">Contractor to provide shop drawings for all electrical and plumbing fixtures, for designer's approval.Contractor to provide a prototype for all custom light fixtures before proceeding with work.Prior to construction, it is the Contractor's responsibility to coordinate all the drawings and site conditions to ensure that both the existing and the new services ducting, piping, conduit equipment, fixtures etc. do not interfere with the interior work. If there is any interference, the Interior Designer must be notified before construction begins for necessary modifications of the work to suit. No extras will be entertained for any alterations and/or additional work to accommodate such modifications during or after the Construction Period.All Safety, Mechanical and Electrical devices such as: pull stations, thermostat, switches, dimmers, handicap door switch button, exit signs, fire alarms, fire extinguisher locations must be verified prior to proceeding with work.Provide appropriate numbers of commercial grade dimmers for all lighting except fluorescent lighting.Contractor must verify zoning of lights with designer prior to proceeding with work.Provide Exit signs & emergency lights as required by local by-laws and codes and regulations.All lighting specification to be provided by lighting designer and reviewed and approved by designer.All lighting location, quantities and intended lighting affect to be reviewed by lighting designer.Mechanical Engineer's Drawings for concealed Ceiling Access Hatch LocationRefer to mechanical drawings for quantities of the ceiling access panels. Refer to ID drawings for final sizes and locations. See typical detail 5/ID809. <p>F Graphic, Communication, Signage and Mural</p> <ol style="list-style-type: none">Unless otherwise noted, all graphic communication is by others. Contractor must coordinate with graphic designer for installation of graphic panels prior to proceeding with work.Unless otherwise noted, all mural art work by others, Contractor to prepare surface as specified by mural Artist. Refer to specification package.	<div><p>ISSUED FOR PAINT AND TILE TENDER NOT FOR CONSTRUCTION DECEMBER 14, 2020</p></div>

1:25 FURNITURE PLAN

Architectural partition plan for Standard King Type E. The plan shows a bathroom area on the left and a large open area on the right. The bathroom contains a toilet, a sink, and a shower area. The open area is a large rectangle with a door on the right side. The plan includes dimensions for various elements, such as the toilet (1535), the sink (460), and the shower area (1280). It also shows grid lines J, K, L, and 3. Callouts indicate the location of wall panels for lighting switches and hardware, and the location of the door. The plan is labeled with 'ID-GR 361.02' and 'ID-GR 311.01 SIM.'.
